

## eDISCOVERY

---

**RSI offers a rich history of premiere litigation support services - nationwide.**

RSI delivers the knowledgeable and timely litigation support services you demand. We succeed by helping you to succeed.

We have been committed to excellence since our founding in 1969. Today, RSI is one of the nation's most trusted litigation support service providers. We constantly adapt innovations and continue to deliver success to firms like yours.

### RSI's eDiscovery Practice

---

RSI's eDiscovery Practice has given clients the information and confidence to gain leverage in winning strategies, since 1998.

**Electronic evidence is a common part of litigation.**

Electronically Stored Information (ESI) is accumulated across all media types. RSI's eDiscovery Practice captures and preserves vital information, culls unwanted information and identifies relevant data in defensible procedures.

**Best practices ensure your confidence in the process.**

Our procedures are consistent, defensible and based on the industry's best practices. Using the most current collection technology, RSI's eDiscovery process verifies data gathering as it occurs.

### RSI's eDiscovery Process offers:

---

- Defensible procedures and sound production
- Collection consistency & integrity
- Single-source accountability
- Decrease in your liability
- Preserves:
  - metadata
  - file timestamps, and
  - hash verifies results
- Chain of custody
- Court representation experience
- Cost effective strategies

### Early Data Assessment

---

- ✓ DeNISTING
- ✓ DeDuplication
- ✓ File filtering
- ✓ Categorization
- ✓ Pre-culling
- ✓ Iterative reporting

## Computer Forensic Acquisition

**Expert computer forensics with an uncommon persistence.**

RSI's computer forensic analysis looks for patterns and relationships in data, based on criteria established by the client. The process combines technology with expertise to provide content in a meaningful context. Computer forensic acquisition is required to recover removed, deleted or hidden files.

**Defensible procedures start with single-source accountability.**

RSI's Forensic eDiscovery System offers single-source accountability to ensure data integrity and avoid gaps or duplications in the data collection process. Our procedures are defensible, and as an impartial third party, RSI has the experience to represent the data collected in court.

### Forensic Investigation Types:

- Theft of intellectual property
- Employment disputes
- Use of unlicensed software
- Email misuse
- Insurance fraud
- Adherence to federal, state and local internet laws

## Web Repository

The RSI Web Repository, powered by Ringtail® Legal™ software from FTI Technology, provides a proven large-scale litigation database review platform that offers unmatched power, efficiency, and flexibility throughout the litigation life cycle.

### Key Benefits

Reduce Risk & Complexity by integrating all phases of the litigation life cycle – from data storage, electronic evidence discovery, file review and production.

Review documents faster and more accurately with advanced search options that offer flexibility, including – native review and quick preview in over 250 file formats; such as Microsoft Word and Excel.

Massive scalability allows users the power to manage huge volumes of electronically stored information.

Object level security architecture that protects the privileged electronically stored information.

Eliminate time and location obstacles with a central repository for attorneys and experts to review from multiple locations.

Create project transparency with the ease of report tools giving users the option to highlight, underline, or make notes directly on the documents.

Robust redaction tools that both optimize review times and eliminate the need to move documents between tools.
